[Oregon CZARA History.docx](#)

Hi Everyone,

For our managers, I put together a timeline of correspondences and key bullets. This is to give them a snapshot of the history and also to put into context our December 21, 2012 letter and conversations between EPA management and ODEQ that have implied that EPA was setting a new bar re: CZARA requirements. It builds on documents Jayne et al have put together in the past. I'm going to help out to respond to questions from our management here so the rest of the group can focus on the key messages/baseline for CZARA approval. Don't spend a lot of time looking at this, but if you have comments, let me know. I'm going to send it out sometime next week.

Dave, Alan, and Don, given our talk this morning, I wrote Allison and asked if she'd be willing to pull together the key messages/baseline for approvals of our agencies to follow the pattern of how you've all worked together so well. Then perhaps at the April 9, there can be less time to coming up with the key messages and baselines and more focus on coming to agreement on the key messages the group has already developed and understanding each of our agencies' baselines. Then as we brief up the chain, the focus on future briefings can be on the key messages rather than on the past. Those are my thoughts on how the process seems to be fleshing out, and I'm here to help out, so let me know what else I can do.

Thanks,

Jenny
